# GENERAL INFORMATION

## Our History is Over 100 Years Long

It all began back in 1892 when Sam Garvin, a former employee of Thomas Edison, decided to begin supplying customers with electrical installation products. In the early days, this meant fabric-insulated wiring, wooden and Bakelite boxes, and porcelain insulators for exposed interior wiring. Electrical power didn't begin to receive widespread acceptance until 1910, so Sam was years ahead of the game.

While the youthful Sam Garvin & Co. had to stock only a few hundred electrical components at the turn of the century to satisfy its clientele, today Garvin manufactures and stocks thousands of items to meet modern electrical needs nationwide. But we still retain that small-family-business spirit serving local and national distributors with the care and concern that has allowed us to thrive for over a century.

## If it's Electrical-related, We Can Help You

Although this catalog represents our best and most thorough effort to show you all of our products, we are continuously finding and adding new ones to our inventory. We also design and manufacture new products that provide economical answers to installation problems in the field. Furthermore, many of our customers enlist our help to design and manufacture custom products that meet their specialized needs. We often provide special stocking and pricing programs for such items.

***So - if you don't see what you need in the catalog,*** please feel free to call us any time to inquire about new items or discuss the design/manufacturing of a component you've been dreaming about. We'll be glad to assist you throughout the process and recommend the most economical fabrication method. Our century of experience will save you time and money.

## Our Custom Capabilities

PUL-PAL Reduces Wire Drag During Pulling

- Metal stamping
- Wire forming
- Die casting
- Injection molding
- Machining
- Fabrication
- Prepackaging

Cast Steel Liquid-Tight Connector

VBKT Bracket for Lamp Hanging

52181-DEK Box for Corrugated Deck Ceilings

# GENERAL INFORMATION

Article 370 of the National Electrical Code covers the installation and use of boxes. The article includes table references that guide the electrician in the selection of proper size box necessary to safely accommodate electrical service requirements. The box capacity table is reproduced in part from the N.E.C. as a quick reference and guide. The N.E.C. should be consulted for complete details.

## ARTICLE 370 - Boxes and Fittings

**370-6 . Number of conductors in Outlet, Device, and Junction Boxes, and Conduit Bodies.** Boxes shall be of sufficient size to provide free space for all conductors enclosed in the box. The provisions of this section shall not apply to terminal housings supplied with motors (See Section 430-12.). Boxes and conduit bodies containing conductors, size No. 4 or larger, shall also comply with the provisions of Section 370-18.

**a) Standard Boxes.** The maximum number of conductors permitted in standard boxes shall be as is listed in Table 370-6(a). See Section 370-18 where boxes or conduit bodies are used as junction or pull boxes.

(1) Table 370-6(a) shall apply where no fittings or devices, such as fixture studs, cable clamps, hickeys, switches, or receptacles, are contained in the box. Where one or more of these types of fittings, such as fixture studs, cable clamps, or hickeys are contained in the box, the number of conductors shown in the table shall be reduced by one for each type of fitting; an additional deduction of two conductors shall be for each mounting yoke or strap containing one or more devices; and a further deduction of one conductor shall be made for one or more grounding conductors entering the box. Where a second set of equipment grounding conductors, as permitted by section 250-74, exception No. 4, is present in the box, then an additional deduction of one conductor shall be made. A conductor running through the box shall be counted as one conductor, and each conductor originating outside of the box and terminating inside the box is counted as one conductor. Conductors, no part of which leaves the box, shall not be counted. The volume of a wiring enclosure (box) shall be the total volume of the assembled sections, and, were used, the space provided by plaster rings, domed covers, extension rings, etc., that are marked with their volume in cubic inches, or are made from boxes the dimensions of which are listed in Table 370-6(a).

(2) For combinations of conductor sizes shown in Table 370-6(a), the maximum number of conductors permitted shall be computed using the volume per conductor listed in Table 370-6(b), with the deductions provided for in Section 370-6(a)(1) and these volume deductions shall be based on the largest conductor entering the box. The maximum number and size of conductors listed in Table 370-6(a) shall not be exceeded.

**(b) Other Boxes.** Boxes 100 cubic inches or less other than those described in Table 370-6(a), conduit bodies having provisions for more than two conduit entries and nonmetallic boxes shall be durably and legibly marked by the manufacturer with their cubic inch capacity. The maximum number of conductors permitted shall be computed using the volume per conductor listed in Table 370-6(b), with the deductions provided for in Section 370-6(a)(1), and these volume deductions shall be based on the largest conductor entering the box. Boxes described in Table 370-6(a) that have a larger cubic inch capacity than is designated in the table shall be permitted to have their cubic inch capacity marked as required by this section and the maximum number of conductors permitted shall be computed using the volume per conductor listed in Table 370-6(b).

## KNOCKOUTS

Garvin conduit K.O.s have ties placed for easiest removal by electricians. Illustrations show placements of K.O. ties. Cable pry-outs are slotted so a screwdriver twist removes them.

## Plaster Ears

Plaster ears are set 1/16" forward of box opening in the "old work" position. Screw ears are supplied on shallow boxes and where access to conduit K.O. is required. One-screw ear is supplied on most other types of boxes.

## Tapped Ground Holes

Most Garvin boxes have tapped #10-32 grounding holes.

## Standards

Underwriters' Laboratories file number is E-22445 and E-29598. For Underwriters' Laboratories Inc. listing marks, see Garvin products and carton labels.

Conforms to federal Specifications And Standards W-J800E.  
Also A.N.S.I./NEMA OS1-1984.

All Materials are zinc electroplated or galvanized steel.

Phone: 847-455-0188  
Fax: 847-455-0334

# GENERAL INFORMATION

## GARVIN INDUSTRIES (GARVIN) TERMS AND CONDITIONS OF SALE

**FREIGHT TERMS:** All Garvin shipments are F.O.B. shipping point. Title and risk of loss to the distributor on delivery to the initial carrier. The distributor should file any claim for loss or damage in transit with the carrier.

If distributor delays any shipment, Garvin shall nevertheless be entitled to payment and may invoice distributor for the shipment and hold it at distributor's risk and expense until receiving further instructions.

**PRICING:** Prices are subject to change without notice unless protected for a specified time as part of a written quotation for specified quantities.

**MINIMUM CHARGE:** Garvin minimum charge is \$100.00 net.

**SHORTAGE CLAIMS:** Claims for shortages must be made in writing to the Garvin home office at 3700 Sandra Street, Franklin Park, IL 60131, within 10 days after receipt of the products.

**RETURNS:** Returned products will be accepted for credit only with the written permission of the Garvin home office. All returned products must be shipped to Garvin Industries, 3700 Sandra Street, Franklin Park, IL 60131, unless otherwise directed. Products that are obsolete, discontinued, were custom designed or more than 12 months old will not be accepted for return or credit. All returned products are subject to a restocking fee of up to 25% (of net order value).

**TAXES:** The right is reserved to add to the sales prices any taxes imposed by law on the sale of Garvin products.

**DELIVERY:** Shipping schedules are based on estimate and Garvin shall not be liable directly or indirectly for delays caused by lack or necessary labor, power, materials, or manufacturing facilities, or delays to acts of God, severe weather, acts of the buyer, suppliers, government authorities, fires, floods, strikes, riots, disasters, delays in transportation or any other causes beyond the reasonable control of Garvin. In such event, at Garvin's option and without liability, delivery dates shall be extended or all portion of the order will be canceled.

**LIMITED WARRANTY:** While Garvin products are carefully inspected, it is not always possible to detect all imperfections. Garvin products are warranted against defects in workmanship and materials for a period of one year from the date of invoice to the original purchaser. Liability in all events is limited to the purchase price paid and all liability under the aforesaid warranty is limited at Garvin's option to either refunding the purchase price paid, or repairing or replacing any product Garvin determines to have been defective in material or workmanship at the time of delivery to the original carrier.

THERE ARE NO IMPLIED WARRANTIES THAT THE PRODUCTS ARE MERCHANTABLE OR FIT FOR PARTICULAR PURPOSE AND ANY SUCH WARRANTIES ARE SPECIFICALLY DISCLAIMED, AND LIMITED WARRANTY CONTAINED IN THE PRECEDING PARAGRAPHS IS THE SOLE WARRANTY OFFERED BY GARVIN.

Garvin has made a diligent effort to illustrate and describe the products in this catalog accurately; however, such illustrations and descriptions are for the sole purpose of identification. Products may not always totally conform to the illustration or descriptions. Garvin is not responsible for the improper selection, installation, alteration, or misuse of any of its products. Products sold by Garvin but manufactured by others are not warranted by Garvin and any purchase is limited to only the warranties offered by the actual manufacturers of the products.

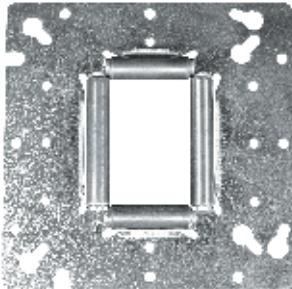

No warranty of affirmation of fact, expressed or implied, other than the aforesaid is made or authorized by Garvin. Under no circumstances shall Garvin be liable for incidental or consequential losses or damages of any kind.

**PROMPT DISPOSITION:** Garvin will make a good faith effort for prompt disposition regarding any product which proves to be defective. Before returning any product, write or call Garvin, giving date and original invoice number and describe nature of defects. If products were damaged in transit, file a claim with the carrier.

**MODIFICATIONS:** No modification of the terms and conditions above shall be made by any manufacturer's representative, salesman or any other person unless said modifications are in writing and signed by an officer or the sales manager of Garvin.

**ACCEPTANCE:** All orders are subject to confirmation and credit approval by Garvin, as well as to terms and conditions detailed above. Any differing terms and conditions, discounts, or special prices submitted with an order shall be considered objected to by Garvin, and therefore not applicable unless accepted in writing by an officer or the sales manager of Garvin.

**GOVERNING LAW:** These terms and the actual sales of products pursuant to any other order shall be governed by the laws of the state of Illinois.

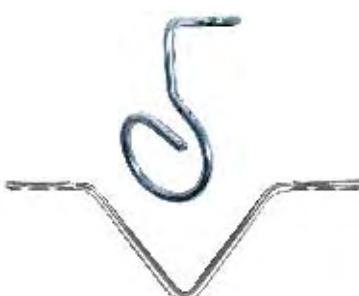

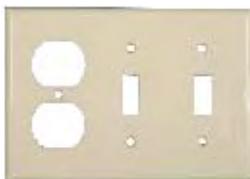

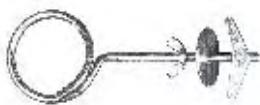

Patent Pending

U.S. Patent No. 10,659,072

# CUSTOM MANUFACTURING

GARVIN provides a broad array of custom manufacturing services. Contact us whenever you need design assistance or specialized manufacturing capabilities. We'll be glad to help you. We have years of experience producing a variety of products for the industry. Our capabilities include:

Metal stamping

Machining

Wire forming

Die casting

Metal forming      Injection molding

Fabrication

Prepackaging

And what else? Call us.

ALL MODELS COMPLY WITH NEW UL & NEC CODE REQUIREMENTS

# *Are you tired of those huge energy bills for facility lighting?*

**GARVIN has a solution that will save you big \$\$\$\$ on two wasteful energy fronts!**

## **Super-High Output Compact Fluorescent Lamps (CFLs)**

CF12Q66 300W (Mogul)  
12 Plug-in Lamps (26W Ea.)

*Each Plug-in lamp  
is independently replaceable!*

### **If you're using metal halide lamps:**

You're paying for more heat than light, and that heat is also costing you more to operate your air conditioning system. Metal halide lamps typically operate at 1385°F, with low light-output efficiency. Compared to what compact fluorescents can provide, your metal halides are wasting electrical energy and converting it to heat instead of light. CFL lamps are vastly more efficient and operate at less than 100°F. CFL use in factories and warehouses is sweeping the country.

### **Warehouse Lighting Comparison**

400W Metal Halide Lamps  
\$1000 Annual Energy Cost

Operating Temp: 1385°F  
Costly Heat Load on A/C

300W HO Fluorescent Lamps  
\$420 Annual Energy Cost

Operating Temp: 95°F

Quick payback in Energy \$avings

### **ADVANTAGES OF COMPACT FLUORESCENTS**

- Up to 1,500W Incandescent Equivalent!!
- Replaces Metal Halide lamps (110-277V)
- 82% energy-cost savings
- Short payback period
- Improved uniformity & color rendering
- 1400% Less heat production
- No associated fire hazard

### **Super-High Output Compact Fluorescent Bulbs**

PART NO.	WATTS	EQUIV. INCAN. (W)	VOLTS	LUMENS	COLOR TEMP.

## THE BREAKER BIBLE CD PROGRAM

A searchable database of every circuit breaker manufactured since 1940!

Includes the following info:

- Detailed photographs
- Electrical specifications
- Dimensions
- Application
- Interchangeability Guide
- Availability & Pricing
- Years made, Current/Obsolete

ORDER P/N: BB-1

"It's a sin...

...to replace the whole breaker panel  
when you can simply consult **The Good Book.**

Start here by selecting the likely  
breaker manufacturer and model.

Then view specifications  
and photos to find a match.

See page **182** for more info.

## CROSS+CUT

### Ladder Pipe Support Brackets

- Converts your ladder into a pipe vise!
- Brackets snap onto all ladder steps
- Securely holds up to 1" diameter pipe, rod or tube during cutoff
- Rugged aluminum construction
- Don't weaken your ladder with holes/notches

**ORDER  
TODAY!!**

ORDER P/N: CRSCUT

Rugged  
Aluminum  
Brackets

Puts an end  
to awkward  
sawing and  
broken blades!

See page **183** for more info.

## "KWIK-HANG" SWIVEL FIXTURE HANGERS

(U.S. PATENT NO. 6,649,837)

SC-5075HF

SC-5075HFR

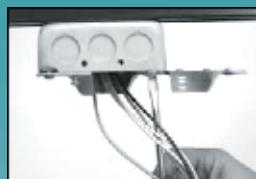

See page 170 for our whole line of swivel hangers.

PART NO.	DESCRIPTION	STD. PKG.
SC-5075HF	4" SQUARE SWIVEL FIXTURE HANGER WITH DOOR FOR EASY MOUNTING AND WIRING BY ONE ELECTRICIAN. USED WITH 1/2" OR 3/4" THREAD PIPE.	25
SC-5075HFR	4" ROUND SWIVEL FIXTURE HANGER WITH DOOR FOR EASY MOUNTING AND WIRING BY ONE ELECTRICIAN. USED WITH 1/2" OR 3/4" THREAD PIPE.	25

## INDUSTRIAL FIXTURE INSTALLATION NOW A ONE-MAN JOB!

Tighten the pivot onto the fixture stem.

Mount cover plate (with its door open) onto the ceiling box.

Lift light fixture and set its pivot in place on swivel cover. Connect and dress the wiring.

**BALL JOINT ALLOWS 20° SWING FROM VERTICAL!**

Rotate fixture so slot in pivot aligns with T-tab in cover. Press the T-tab into the pivot.

Close the cover door and secure it with screw.

**LOAD RATED TO 50 LBS!**

Phone: 847-455-0188  
Fax: 847-455-0334

## CEILING PAN DECK BOX

**SAVES TIME & CUTS  
MATERIAL COSTS  
BY 50%!**

**NO MORE STRUT INSTALLATION!  
NO MORE CONDUIT OFFSET BENDING!**

U.S. Patent No.  
10,659,072

**NEW WAY**  
PAN DECK BOX

**3 COMPONENTS  
NO OFFSET BENDS!  
QUICK & EASY!**

### PAN DECK BOX ADVANTAGES

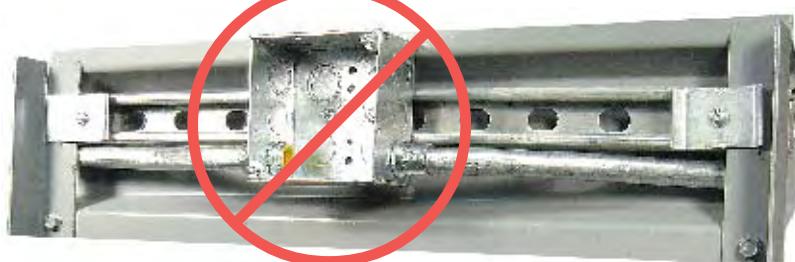

- Fast install - No conduit bending
- Allows offset-free piping
- Box entry from all sides
- Easier wire pulling - no offsets
- Solid mount - 4 screws in ribs
- Deeper, roomier box
- Lower materials cost

### "OLD" WAY HEADACHES

Lengthy install time - 7 Strut parts!  
Requires conduit bending  
Strut cutting and leftover waste  
Offsets impede wire pulling  
Teetering mount - 2 center screws  
Small box volume  
High materials cost

**"OLD" WAY**  
STANDARD BOX

**6 COMPONENTS  
2 OFFSET BENDS  
LABOR INTENSIVE!  
VERY EXPENSIVE!**

# LIGHTING, LAMPS & ACCESSORIES

**Compact fluorescent lamps (CFLs) are the energy-saving wave of the future.**

***And you can purchase them today!***

**What makes these new bulbs a better lighting alternative?**

## ★ Very Low Energy Consumption

Only 18% of that consumed by incandescent bulbs. You **save 82%** on your electric bill while conserving energy! **Get paid to be green!**

## ★ Very Long Operating Life

Typical CFL life is a whopping **10,000 hours!** Incandescents typically last only 1000 hours. So you would **replace only 1 CFL instead of 10 incandescent bulbs!** At 6 hours of use per day for a 100W-equivalent bulb, and 8¢/kWh, that's a **\$64 savings!** And the CFL lasts **4½ years!**

## ★ Full-Spectrum Color Rendering

The CRI (or Color Rendering Index) for CFLs is 82-86 on average, typically better than those for other CFLs on the market. Their balanced red-green-blue output is easier on the eyes and won't cause undesirable tints in photos and home videos.

## ★ Safe, Low-Temperature Operation

Compact fluorescent lamps operate well below 100°F. This puts significantly less load on your air conditioning system while also ensuring safe conditions for children, pets and fire prevention. Incandescent bulbs can burn your hands while halogen bulbs, typically operating near 1000°F, can start fires!

**Let's talk tech on CFL features and advantages**

Advances in electronics, phosphor coatings, and reduction of tube size have established CFLs in their leading position in global energy-conservation programs. Their excellent color rendition and the wide variety of available sizes, shapes, and wattages make them suitable for all new and retrofit applications.

Allied Partner In:

## Outstanding Features

VOC-FREE components per LEED Standard

Reliable operation down to -25°C (-13°F)

Phosphor: HI-VISION

RGB colors balanced

Electronically switchable (by photocells, etc.)

High Output up to 300W (1,500W incandescent equiv.)

## GARVIN CFL Specifications

**Lumens Per Watt:** 76.5 Average

**Color Rendering Index:** 86 Average

**Color Temperatures:** 2700K, 3200K, 4100K, 5500K, 6500K

**Life span:** 10,000 hrs

**Power Factor:** > 0.65

**Total Harmonic Distortion:** <9.8

**Operation:** Flicker-free, silent

**Start-up:** Instant (within 1/12 of a second)

**Initial Illumination:** 95% at start-up

**Time to 100% of initial lumens:** 2.78 seconds

**Operating Frequency:** less than FCC, CFR, Pt. 18 limits.

**Ballasts:** Electronic

### Lighting Glossary

<b>Color Rendering Index (CRI):</b>	expresses the effect of a light source on the color appearance of objects. Values for common light source vary from about 20 to 99. The higher the number, the more realistic and true to life the objects appear.
<b>Color Temperature:</b>	indicates the color appearance of light in Kelvin degrees from 2700°K perceived as Warm, through 4100°K(White), up to 500°K (Day Light).
<b>Lumen:</b>	is the quantity of light emitted by a source. For example, a dinner candle provides about 12 lumens. A 60-watt Soft White incandescent bulb provides about 840 lumens.
<b>Efficacy:</b>	measures the total of lumens emitted by a light source divided by the total lamp power input, expressed as lumens per watt. Average efficacy for CFLs is 50-83 lm/Watt.

## CIRCUIT BREAKER DATABASE CD

### THE BREAKER BIBLE

*A searchable database of every circuit breaker manufactured since 1940!*

Hardcopy not included.

#### Includes the following:

- Detailed photographs
- Electrical specifications
- Dimensions
- Application
- Interchangeability Guide
- Availability & Pricing
- Years made, Current/Obsolete

Find a replacement for that ancient breaker you came across during a renovation.

Seek and ye shall find!

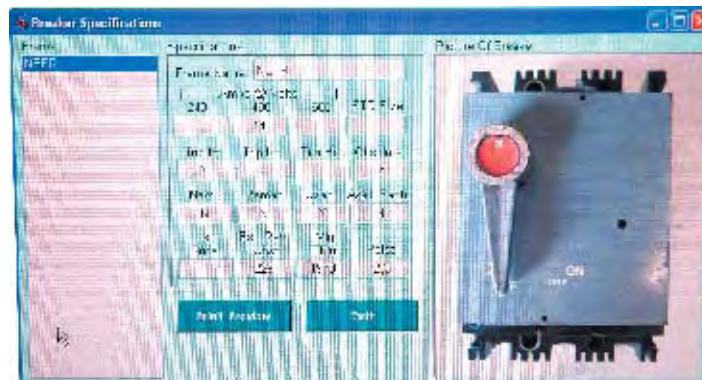

View all the specs. and ratings of a model so you can make an informed, safe decision.

"It's a sin...

...to replace the whole breaker panel when you can simply consult **The Good Book.**"

Start here by selecting likely manufacturer and model.

Then view specifications and photo to find a match.

\*Original logos and all associated logos are trademarks of Duncan Enterprises. © Material & Content Copyrighted 1999-2006, Duncan Enterprises, All Rights Reserved.
